

13 April 1983

STAT

Attached is a copy of the latest equipment inventory taken by myself, the Burroughs Field Engineers and representatives of the agencies acquiring several of the systems. For your information, the items with 'R' and 'F' tags in the right-hand margin are being acquired by NSA. B6930 TRW system 1 is being acquired by the Navy Supply Systems Command (NSSC - NELO) along with the B6930 TRW system 5. The item 9 of B6930 TRW system 3 is being transferred to DIA. NELO, which is located at Crystal City, Va, has agreed to tranship the unit with their two systems. There are also several of the items listed on the Miscellaneous equipment page that are actually installed features on the systems. The other miscellaneous items will be eventually packed and shipped to GSA for disposal upon final settlement of the Burroughs-TRW Processor Interface Unit Development contract. The remaining three B6930 systems have not been reassigned to other agencies as of this date.
